

1. fork 받기 (원래는 활성화 되어있습니다)

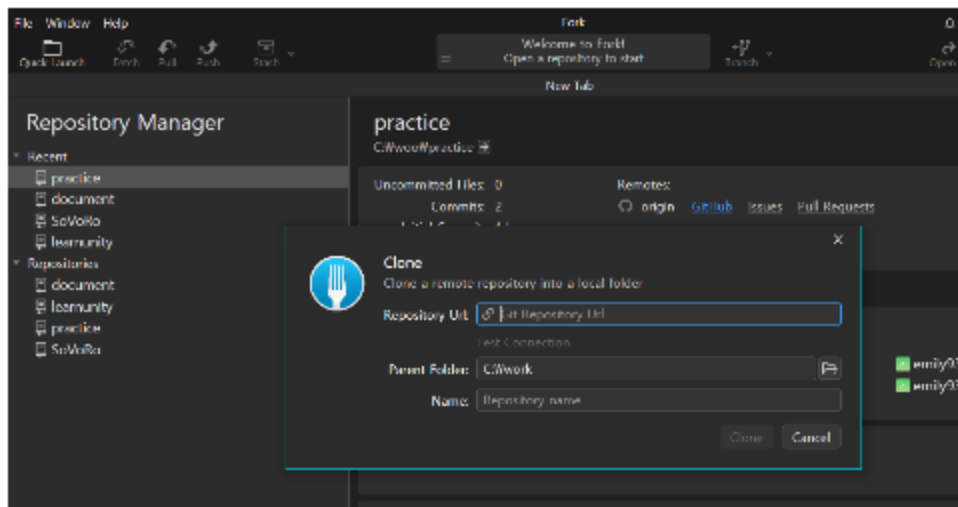

2.주소 복사하기

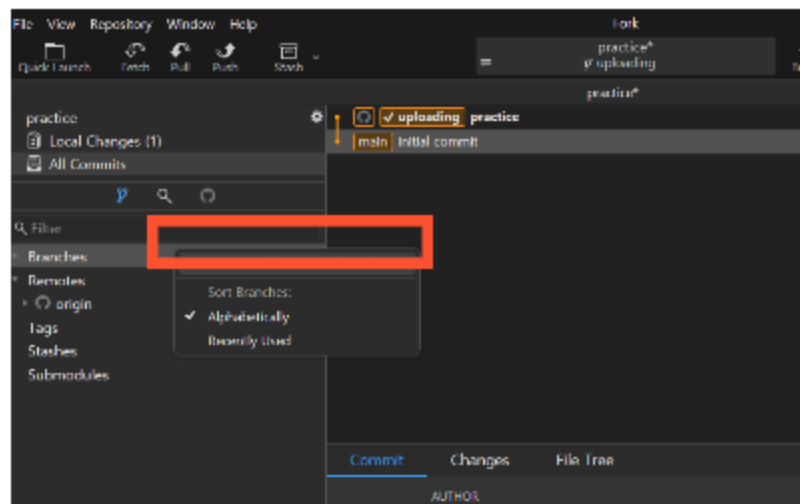

3. file 클릭 후 clone 누르기

4. clone 받기

5. 브랜치 만들기

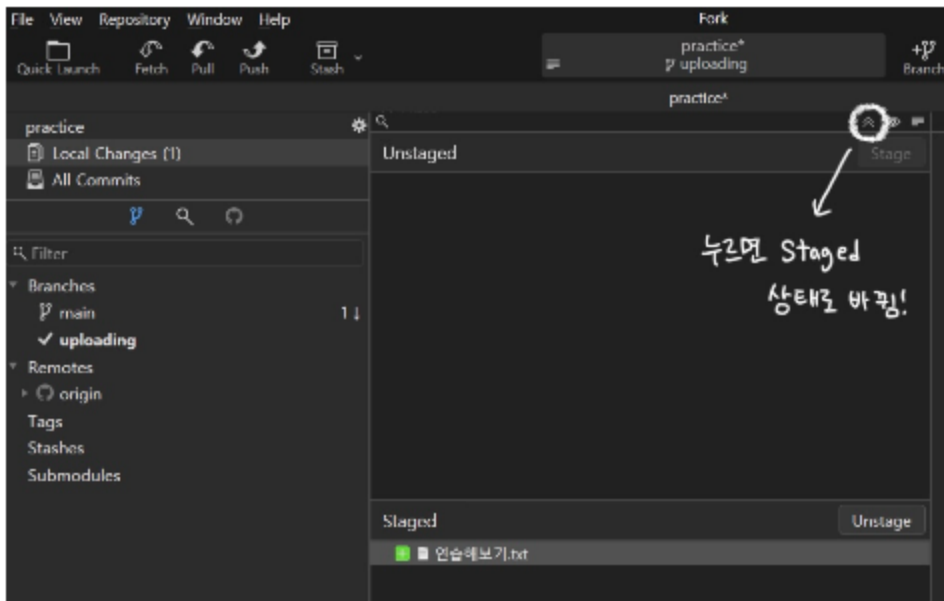

6. 브랜치에 올릴 파일 추가하기

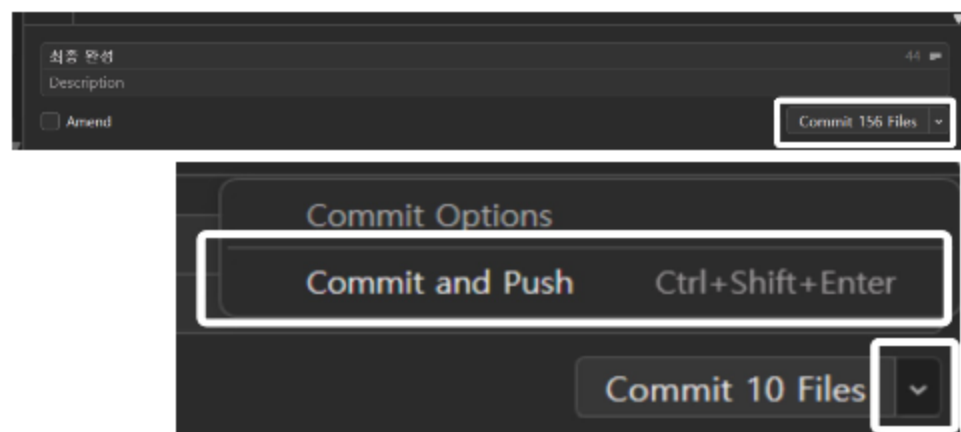

(내가 만든 브랜치에 체크 표시가 되어있는 상태에서 복붙하기!)

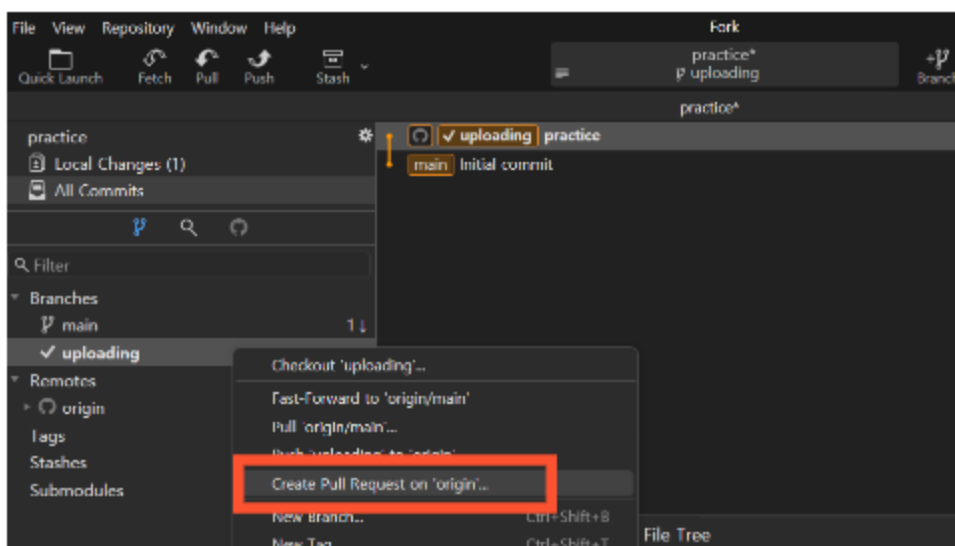

7. 파일을 Staged 상태로 만들기

8. 코멘트 달고 Commit and Push 누르기

9. 어느 브랜치인지 선택하고 Pull Request 누르기

10. 어디로 요청하는지 확인한 후 코멘트 달면 끝

The screenshot shows the GitHub 'Open a pull request' page. At the top, there are navigation tabs: Code, Issues, Pull requests, Projects, Wiki, and Insights. Below the tabs, the heading 'Open a pull request' is followed by a subtext: 'Create a new pull request by comparing changes across two branches. If you need to, you can also compare across forks.' A red box highlights the comparison section, which includes 'base fork:' (selected as 'base: master'), 'head fork:' (selected as 'company: develop'), and a green checkmark stating 'Able to merge. These branches can be automatically merged.' Below this, the 'Write' tab is active, showing a text area for the pull request description. A red arrow points to the text area with the annotation '① 어디로?' (Where to?). Another red arrow points to the 'Create pull request' button with the annotation '③ 누누!' (Nunu!). A red box also highlights the 'Create pull request' button. The text '② 코멘트 달기' (Add comment) is written in red in the text area. At the bottom, there is a checkbox 'Allow edits from maintainers. Learn more' and the 'Create pull request' button.

Open a pull request

Create a new pull request by comparing changes across two branches. If you need to, you can also compare across forks.

base fork: base: master ... head fork: company: develop

✓ Able to merge. These branches can be automatically merged.

첫번째 PR

Write Preview

② 코멘트 달기

Attach files by dragging & dropping, selecting them, or pasting from the clipboard.

① 어디로?

③ 누누!

Allow edits from maintainers. Learn more

Create pull request
